

How to Turn Off "Find My Mac" Instructions:

Login to iCloud:

Open a web browser and go to www.icloud.com.

Apple ID Login:

Sign in using the Apple ID that is configured on your MacBook.

Access Find My Mac:

Visit <https://www.icloud.com/find/>

Device Selection:

Click on "All Devices" and select your MacBook from the dropdown list.

Remove from Account:

Look for the "Remove from Account" option and click on it.
Confirm your action if prompted.

Apple ID Management:

Open <https://appleid.apple.com/account/manage/section/devices> in your browser.

Navigate to Devices:

Navigate to the "Devices" section.

Remove from Account:

Locate your MacBook device and select the option to "Remove from Account.".

Congratulations! You have successfully disabled the "Find My Mac" feature for your MacBook.
