

**Here's a guide for connecting to the WiFi network "Contentstack" from the VIRAR & CXC office:**

**1. Search for the WiFi network:**

On your office laptop, navigate to the list of available WiFi networks and look for "Contentstack" WiFi name.

**2. Enter your credentials:**

**Username:** Your name in firstname.lastname format. For example, if your name is John Smith, enter *john.smith* (this is the first portion of your official email address).

**Password:** Use your JumpCloud account password, which is the same password you use to log in to your computer.

**3. Trust the certificate\*\*:** When prompted, click on "Trust" in the certificate window to proceed with the connection.

Once you've completed these steps, your laptop should be connected to the "Contentstack" WiFi network, allowing you to access the internet and other network resources from the VIRAR & CXC office.
