

Launch the Slack application and navigate to the search box at the top of the interface. Type "Appstore" into the search box and press Enter.

Navigate to the App Store & Click on it to open the App Store.

Within the App Store interface, locate the "Request Access" button. Click on it to proceed.

In the "Which app do you need" section, search for the apps you require access to. Enter the requester's email ID in the "Request for" box.

App requestor's Slack notification after requesting the access:

Once approved by the manager, the request will trigger a Slack notification, followed by app provisioning by the respective app administrator.
